

# Vegetation Maps

A **vegetation map** shows what kinds of vegetation, or plants, grow in a certain area. The map key shows you how to identify each kind of vegetation. For example, dark shading on the map below stands for cropland.

**Directions** Use the map to answer the questions.

1. Most of Egypt has what kind of land?

\_\_\_\_\_

2. Grassland is found in areas that are dry but not as dry as deserts. Which country is mostly grassland: Kenya or Gabon?

\_\_\_\_\_

3. Are there more forests in the northern or central part of Africa?

\_\_\_\_\_

4. In one African country, about three fourths of the people farm. Three of the main crops are peanuts, rice, and millet. Based on the map, is the country Gabon or Senegal?

\_\_\_\_\_

# Vegetation Maps

## Answer Key

---

1. desert
2. Kenya
3. central part
4. Senegal
