

Which Worm?

If the sentence describes weathering, color the worm yellow.

If the sentence describes erosion, color the worm orange.

1. A river moves rocks by carrying them in its current.

2. Water freezes in a crack in an asphalt street and a pothole begins to form.

3. Water dissolves part of a rock, making an underground cave.

4. Small pieces of sand are carried by the wind.

5. Water washes rocks and soils down slopes, causing a mudslide.

6. Boulders beside a river become smaller as water wears them away.

7. Ocean waves tear sand away from a beach.

8. Rain washes soil from hills and fields into rivers.

9. Rocks and pebbles in a river become smooth as they smash into other rocks.

10. The roots of a tree break apart rocks beneath the soil.

Bonus Box: Reread the sentences above. Find the name of a thing that can cause both weathering and erosion. Write the name here. _____

Answer Key
